

## **Vaccinations**

Because Intellitec College is not a public institution, we are not required to maintain a Vaccination Policy for our students; however, in the interest of public health, we do not want this to be construed as discouraging any student, employee, or staff member from voluntarily participating in routine vaccinations as recommendations by and according to the guidance of their local public health care agency.

In addition, because of potential career related exposure to blood borne pathogens, students enrolled in the Medical Career Training Programs can expect to be required to have Hepatitis B vaccinations as a condition of their externship placement and/or future employment in a healthcare setting. All students who elect to waive this vaccination must sign a waiver form that will be kept on file with their program supervisor.
